Once upon a time there
was a very fast runner in
New York City. As a child
his father taught him
to streak across the city.
By way of a metaphor, his
father was a postal worker
in the big old S Post Office
called J.P.O.

As a runner he would learn
the city by going to hall meets
in Manhattan, New Bronx, Queens,
Brooklyn and Staten Island!

His father would sometimes
tell his stories about postal
workers who were making
fast messengers.

Messengers and the City Page 3

Some times after hall meets
~~in high school and summer~~
perhaps he and his brother
would explore the city. For they
knew if they reached it
they could become messengers,
not just any messengers
but fast messengers.

One day Kent and Bruce reached
a job and decided to become
messengers in the city.

was working for her husband
having left messenger industry
after working for 10 years
from 1990 to 2000. Being a
100% messenger in those years
I decided to make much money
though I heard something
about about a big company
made. In my opinion such
100% messenger made 250-400k a week
and 100% messenger made 300 to 800
week. And I was not interested
in that business was making money for
I just don't know how much.

By the way I was 1994

The company called
UrbanTech was also
interesting the services.

Kozmo.com would attract
hundreds of millions of dollars
from investors, the so-called
messengers of the future was
curious about Kozmo.com and
kept reading about it as it grew
bigger and bigger.

Then a battle pursued
between Urban Patch and Kozmo.com
over who had the right to use
certain technology. In this battle
Kozmo.com was the victor with Urban
Patch. Kozmo.com was the original when

bankruptcy. I was back working
in the messenger industry. And since
I was beginning writing again on
messengers. I heard stories about
how much money big messengers
were making up to a few million.
Messengers got paid handsomely a
high hourly wage at the time
and could work many hours
a week. I heard they were
so much that some messengers
select in the Kozmo.com
warehouse.

I amuch was also going to make
agreements headquartering in G. J. from
Michigan. A couple weeks after the
NO had to wait at Mobile passenger
service at Service, I got a call
from Dayton/PA the founder of Irene Jones
and former Bryant Messenger. He
told a well known Company was
starting a messenger service and wanted
to see if I would be interested
in an interview. They didn't tell
me name of the company at first.
As I don't know I found it
would be Eby. Whether from
the messenger/grocery or in
my first interview. Any way
I told Joe I would be interested
in the interview and gave him the
OK to have the receptionist call
my telephone number.

To get even/offer I didn't
know the name of the recorder
as well. Joly said someone
would call me explaining
that someone would be Chelsea
Fahle of Milo, can that was
walking with Eby to spot a message
schedule. So when Chelsea call
me I was on a run for mobile
around moving down the street at
my last place. I think about around
25 and 30 are when the call came.
So I stop in the middle of
my run and talk to Chelsea
for about 5 minutes about
my message experience and
set up a time to meet with
her.

She said she didn't
want to meet at her office.

10/26/03

So I suggested we meet at
Starbucks in Union Square on
17th and Broadway. I just
that Starbucks to meet a lot people
there. It's one of the easy
places to get to in the city and
virtually everybody knows
where it is. I have a few
minutes left for the meeting.
Also at the meeting I did
bring a ~~message~~ Milo
excerpt from the San Francisco
Wednesday.

So on the meeting day
explained to me about Milo and
the Eby initiative to have
some day delivery service for
consumers. That I would be
doing the job would be to
purchase items and then

Push them to the westman
at home even the order, but
that the orders would come
through the Milo app carrier
app.

So I question the logic
of this messenger service and
wasn't sure if it was real.
I talk to James from LePark
and now EBay, so I question
asked if this is really EBay
what are the perks. I explain
it perks where I could get
a iPhone and monthly metro
Card. The only perk was they
also order us also South goal
for me carrier while.

After the first meeting,
they told me the job was for me.

The eBay Mail & Install the
same day delivery was from a carrier 5/10/26

Somebody goal and they
order me apparently to join EBay,
but I ~~had~~ would have to go
through the screening process,
so I agree to go through process
and they told were here where
was it.

The Milo office was located
on the 2nd in Manhattan. It was
a very small office that Milo
share with Hunch a other EBay
Company. The screening process
took 2 weeks once approved
I learn I would be the first
EBay New Mexico to run on
New York City. Though it would
be a first run. It was still
the first run. ~~After~~ During my
initial contact that someone

The job was going to be in supervision
 since ~~in~~ I started working for the

 I was even the co-ordinator for
 recent open messages to
 sign on ~~for~~ Mito. I saw
 Mito because for the first month
 ago. The RBA had been had
 been critically set up yet,
 though I just ran recent sheet
 had the RBA had now on it.

Wanting to learn more about
this new service. I started sending

me sold to Ely for 20 million
before starting the Farm in Resurrection
which I found that it was
started by Chris Dixon, Tom Pickney
and the other folk of the farm.
Incidentally I can and have
co-ordinated the Johnson that they
sold to McRae, for my
wildcat dream I could have
have maybe been in some working
in the same office as ~~unknown~~
pioneers. May I see Pickney
into the only one still around
in the office. It's been a great
experience.

Been born in sixties in
Africa America and knowing
the history of my people from
slavery to the white house today.

America is a definitely
a place of dreams & living things
in the noble & elegant and
mystical - good and bad that
will never be solved. My
dreams and thoughts about
life in America has been
through tremendous ups
and downs. That I would
try to unleash into poetry.

But I must say working
at Ebony has got me thinking
America is going to come out
all right in spite of its bad
only many times good that
philosophy in the world only
just as many times bad
Philosophy in the world.

Even within America with
its ongoing in problems,
for someone is murdered every
in the United States and that
not good feeling to me.

Nevertheless I was excited
to signed on to Ebony and
give it go. I had gotten a
position as being a master
cameraman in the city. If at least
maybe I could tell about the
idea was good in fact. The
first couple of months had
been very good progress
and the idea of the camera
being able to get across
what I was saying. If I knew
anything about being
in the Negro's new life.

The Customer in business the

But pay us, no money
The job didn't profit much,
And you only satisfaction is
that we have been so happy

time.

After a few months in
the first phase, ~~Paul~~ Timberlee
the operations manager who
brought in a couple of weeks
after I was hired by Chelsea

All of our sales ~~and~~ wanted
in an first five order. I can't
remember what mine was on
when I went. I have done
an hundred or over a thousand
by now. Customer Satisfaction
is 100% for the first, ~~interior~~
and is today.

In the first month of
Young's yr. EBF markedly
deformed (normal due
to severe infection, Redup),

After subwayed works,
He went out at that FBB
New is on the city.

That first week at going
I met me, Frank Jameson

James took one of the Engineers
even after the Eby had left for
a new job as his president.
Talk with Eby he explained
a little bit about the vision
for FBB now. It was
exciting to hear how the
engineers ~~and~~ and ~~the~~ executives
at Eby went FBB now to service
to which all see the new job
by and even the white coat sales.
I might add that FBB now
in the first months was just
making up on all of the letters
and then turn to the new and with the new.

I told Eby that was just
as was the right place for his
kind of service, because the job
the messengers. It's just it
doesn't go very well for the messengers
the messengers of messengers
into a different way.

The first few weeks customers
were testing the service ~~out~~ out
to see if it was real. At first
making a pickup and delivery
though the mechanism for
the FBB didn't seem real.
It seems like it was a mistake,
before it was up might think.
But for the long days
days of service with a mobile
clearance with ^{mobile} ~~mobile~~
